### The main topics of the symposium:

- *The latest geodynamic stage, neotectonics, volcanism and its sources*
- *Cenozoic lithogenesis and stratigraphy*
- *Pleistocene and Holocene sedimentation*
- *Processes in active faults*
- *Geology and exploration of oil and gas deposits*

The most challenging problems of modern geology in Asia are related to Cenozoic rifting and orogenesis. A progress is possible only due to joint efforts of specialists in different fields of geology, geophysics, geotectonics, deep petrology, and geodynamics.
